

# Pressure Mapping Analysis

## Product – Dyna-Tek Intelligent Air Cushion

The company manufactures a wide range of sizes for each cushion from 10"x10" paediatric through to 30"x30" Bariatric. Selecting the correct size cushion is crucial in the redistribution of pressure for the patient (Pressure = Force/Area). The following two examples show 2 different patients, one male 60kg and one Male 108kg.

### Dyna-Tek Intelligent Air Cushion – 60 Kg Male

### Dyna-Tek Intelligent Air Cushion – 108 Kg Male
